

Max Bosshart

After 4 years of studies as a Dental Technician in Zurich-Switzerland, in the years 1970/1974 he worked 4 year in Dental Ceramics.

Since 1976 Max Bosshart is teaching removable prosthodontics. He had the chance to join 1980 for 10 years with Professor Gerber as an assistant in his scientific work. This work was interrupted several times for activities abroad. For example for 1 year in the USA where he became a master Dental Technician, 3 months in Lisbon-Portugal and then in Mexico City. From 1987 to 1990 he continued his professional studies in Zurich and was at the same time teaching at the Masters Dental Technicians School in Switzerland.

1991 Max Bosshart opened a small facility containing a Clinic for removable prosthodontics, aesthetics and occlusion and along with a dental laboratory, where interested Professors, Dentists and Dental Technician are joining for an update in the Gerber Method or they come for several days for a practical course.

Since the last 30 years, Max Bosshart is teaching in 4 languages all over the world and is very pleased to have the opportunity to meet once more his colleagues in Japan, for whom he has a enormous respect for their professionalism. He teaches globally, in Australia, Canada, Ukraine, Russia and in almost all European countries.

In May 2014 his book on **Occlusion, Prosthodontics and Aesthetics** was published at Quintessenz in Berlin.
